The EY-Microsoft Digital Alliance
Your digital world. Realized.

The EY-Microsoft Alliance combines EY’s Advisory services with Microsoft’s comprehensive digital and cloud technologies to deliver the capabilities you need to help turn your digital enterprise vision into action.

Move at the pace your markets require
The sphere of digital technologies that are impacting your business today – social, mobile, analytics and cloud – is rapidly expanding to create new employee and customer experiences, fundamentally changing how your organization works, interacts and competes. Realizing the full impact of the digital world across your workplace and marketplace is critical to sustainably driving business performance. This requires a strategic vision for digital enablement, a cross-functional commitment to collaboration, a culture of trust, a new playbook for activating workplace innovation and digitally savvy risk management, cybersecurity compliance and governance.

How the EY-Microsoft Alliance can help
We can guide you in how to use Microsoft technologies as your foundation for greater employee collaboration, a platform for better program performance and a vehicle for smarter, more informed decision-making … and we’ll do it in a way that will help keep your assets safe.

Benefits to you
• Security and compliance. We are a market leader in helping clients protect their secure assets, comply with regulatory matters, and verify processes. And we do this through a sharp focus on leadership, alignment, execution and process improvement.
• Performance. Activate a cloud-based solution that propels and aligns every part of your business. We’ll help you use the cloud and other digital technologies to enable greater employee collaboration, deliver tangible outcomes faster and create programs that drive business performance.
• Trusted capabilities. Confidently grow your business around sound digital capabilities and a trusted, compliant cloud platform as you adapt to today’s highly regulated world. We’ll help you predict, monitor and manage risks while also advancing business growth and transformation on the Microsoft Azure cloud platform.
• Sustainable results. Stay agile and adaptable for long-term success with scalable programs and cloud technologies. Our strong strategic consultation and flexible digital technologies can help drive repeatable enterprise programs that can scale with your goals and sustain your business for years to come.

Additional information

Due to environmental, business and regulatory challenges, cloud adoption by businesses is at an all-time high. Instead of asking when to move, more businesses are asking how to move. EY’s Trusted Cloud Services help our clients establish secure, compliant and sustainable cloud solutions. These services include the following:

**EY Trusted Cloud Services**

<table>
<thead>
<tr>
<th>Diagnostic and road map</th>
<th>Migration services</th>
<th>Managed services</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rapidly identify critical gaps and approaches to address end-to-end security, compliance, technical and organizational readiness</td>
<td>Plan and manage the complexity of moving to Azure</td>
<td>Provide continuous control monitoring and compliance transparency over client’s solutions in Azure</td>
</tr>
<tr>
<td>Road map developed will prioritize R&amp;D improvements to enable a secure, compliant and risk-based migration to Azure</td>
<td>Advise on the organizational structure and processes needed to support the Azure model</td>
<td></td>
</tr>
<tr>
<td>Determine business case and migration readiness across the following domains:</td>
<td>Migrate workloads to Azure and assist with cutover</td>
<td></td>
</tr>
<tr>
<td>Workload</td>
<td>Validate a successful migration and transition to a managed service model</td>
<td></td>
</tr>
<tr>
<td>Compliance</td>
<td></td>

</table>

EY’s Trusted Cloud Migration is the second step in developing a secure, compliant and trusted cloud and provides the basis for subsequent Migration Services and Managed Services. Confidently move to Azure with EY’s Migration Services to increase cost efficiency and operational effectiveness.

EY-Microsoft Alliance brings capabilities and understanding of the cloud environment to enable a rapid transition into Azure’s Trusted Cloud the first time by addressing gaps up front. EY’s Trusted Cloud Migration Service provides delivery, as described by each domain below:

- **Program management**
  - The program management domain assists with the planning and execution of the migration.
  - Project plan
  - Cost estimates
  - Stakeholder plan and communications
  - Program monitoring

- **Workload**
  - The workload domain helps clients design a future-state cloud environment and complete the migration to Microsoft Azure.
  - Architect and design future state in the Azure cloud
  - Perform workload and data migrations to Azure
  - Operationalize the workload management in the cloud

- **Security and compliance**
  - The security and compliance domain helps clients address shifts in the control structure required to maintain compliance in Microsoft’s Azure environment.
  - Security design
  - Regulatory and security requirements
  - Control environment and control activities
  - Third-party risk management

- **Process**
  - The process domain helps clients design, validate and implement the process considerations and capabilities needed to reduce risk in a cloud environment.
  - Process validation and design
  - Security management
  - Risk management

- **Organization**
  - The organizational domain assists clients with implementing enterprise readiness, governance structures, and updating individual skills and capabilities to operate in the cloud environment.
  - Leadership alignment and stakeholder engagement
  - Organization design and change
  - People readiness

EY’s Trusted Migration service begins reviewing the diagnostic and road map material. Then project planning and architectural design are performed in parallel across separate domains (workload readiness, compliance readiness, process readiness and organizational readiness).

---

**Outcomes**

- Effective project management, including stakeholder management, cost management, management reporting, execution, monitoring and control
- Increased rate of successful cloud migrations
- Compliance with regulatory and industry standards
- Reduction of business disruptions during cloud migration
- Organizational readiness for move to cloud
